

Josep Bona

Higher Technician in Web Application Development

josepbona.dev@gmail.com

676539423

Barcelona, Cataluña, España

ABOUT ME

Throughout my career, I have cultivated a strong interest in technology, design, and sales. After years of using web services as a user, I decided to take the step of learning how to create them and understand their inner workings, training in the Higher Degree in Web Application Development (DAW). Design, creativity, and logic are, without a doubt, the aspects of this world that I am most passionate about.

EDUCATION

Higher Technician in Web Application Development

Institut TIC Barcelona

WORK EXPERIENCE

Amazon Affiliation with WordPress

Freelance | 2022-2023

I have worked on WordPress websites with Amazon Affiliates, performing SEO tasks including keyword research, content and site structure optimization, and the strategic integration of affiliate links.

I have also analyzed traffic and conversion metrics with the aim of improving product visibility and increasing sales organically.

Almato Iberia S.L

Internship | 2026

DeDevelopment of interfaces and functionalities with React, using React Router for navigation and TanStack Query (React Query) for cache, state management, and API calls.

Implementation and use of the most common React hooks, along with the Shadcn/ui component library to speed up development and ensure the reusability and visual consistency of components.

Training of Computer Vision models for object detection and classification in images, using Ultralytics (YOLO), Albumentations, and labeling processes.

Development of Python scripts for the automated retrieval of images through traffic cameras, as part of the data pipeline for model training.

Application of work methodologies typical of business environments, reinforcing skills in self-learning, proactivity, communication, and self-sufficiency.
